“We turned our passion into a job”
G. Deregibus

1991
DIMSPORT arises from the need to change the parameters of the engine control unit on racing car

2000
Dimsport Toscana flanks the main office by expanding the **R&D** department

2001
A new **Dimsport** branch open in Barcellona

2009
Diesel Dual Fuel proposed by **ECOMOTIVE SOLUTIONS**

2012
Dimsport headquarters moves to **Serralunga di Crea (AL)**

2017
AUTOGAS ITALIA joins Holdim Group

2018
Dimsport North America, Dimsport Centroamerica and **South America**

2019
GLF TURBINE joins Holdim Group

2021
AGRIDEA joins Holdim Group

2021
CIRCUITO DEL MONFERRATO joins Holdim Group

2022
VALIS joins Holdim Group

BIGAS joins Holdim Group

BYTERD joins Holdim Group

2023
GREENFORCE joins Holdim Group

Social responsibility

With the companies of our group we are active in every corner of the planet. Traveling to discover new markets, we learned to respect diversity and to recognize nuances and fragility.
This is why we express our responsibility by dedicating more and more time and resources to community support activities

Leader in the recalibration of engine parameters for the motor industry since 1991, with recalibration tools and software, auxiliary modules, power test benches

The winning idea

The performance of any car can be optimised by electronic calibrations

Next

Solutions for a personalised driving style and enhanced performance, even without endothermic engines

dimsport.it

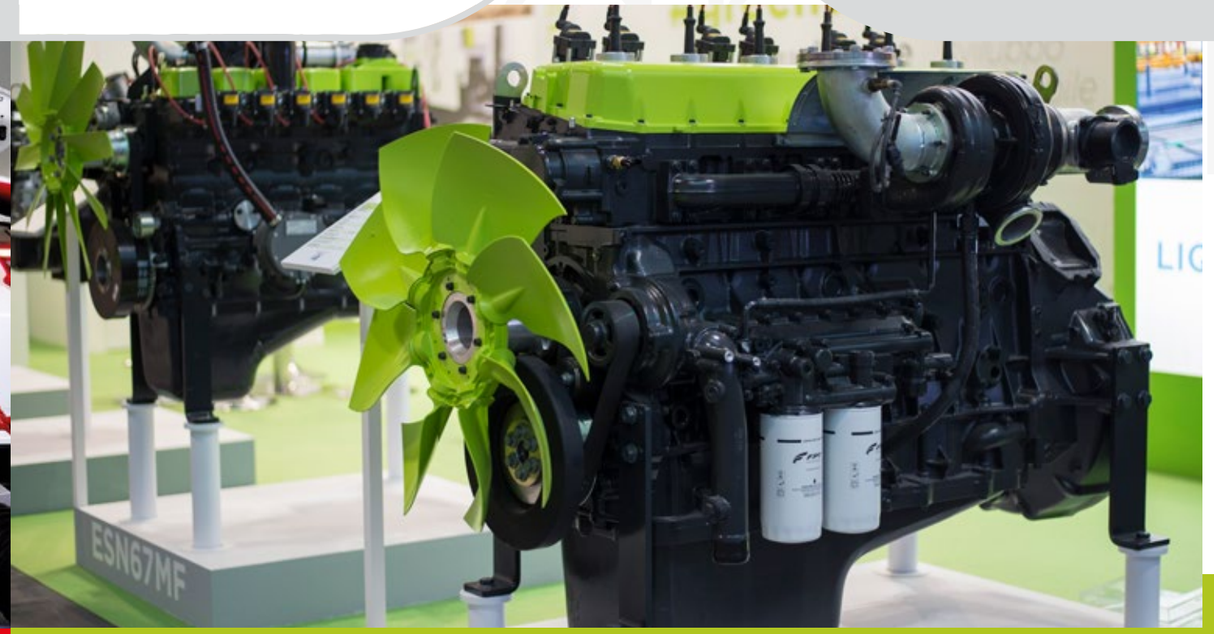
Since 2009, engine control electronics for the use of **alternative fuels** in automotive, industrial, energy, railway and marine contexts

The winning idea

From the Diesel Dual Fuel platform to 'full gas' transformations, Ecomotive is the ideal technological partner for energy transition

Next

Solutions at the service of hybrid gas vehicles, eDME methanol engines, vehicles running on liquid methane/biomethane, cold ironing and mobile gas supply for electric vehicles, hydrogen mobility



ecomotive-solutions.com

AUTOGAS Aitalia

Active since 2000 and part of the Holdim Group since 2016, it **produces and distributes methane/LPG conversion systems** for petrol or diesel vehicles

The winning idea

A versatile contact for professionals in the world of gas conversions of petrol or diesel engines

Next

New partnerships in emerging markets where the development of alternative energy forms is strategic for the growth of the country

Brand of **Ecomotive Solutions**

autogasitalia.it

bigas

Bigas, part of the Holdim Group since 2022, **develops and produces components and complete systems for LPG conversion**

The winning idea

Provides drivers the world over with huge opportunities, working with heart and passion every day to safeguard the environment

Next

Its long history and optimum credibility, built up on the international markets, make Bigas an excellent protagonist in the new global energy scenarios

bigas.it

Brand of **Ecomotive Solutions**

LF TURBINE

Produces stator components for gas turbines and boasts **30 years' experience in the 'Oil&Gas' sector**

The winning idea

Hot parts: combustion chambers, gas ducts and nozzles

Next

Pioneering machinery today and tomorrow, to guarantee ongoing quality improvement

glfturbine.com

VALIS ENVIRONMENTAL TECHNOLOGIES

Design and installation of **systems dedicated to the recovery of petrol fumes**

The winning idea

The possibility to provide remote system control all over the world, thanks to the outstanding effectiveness and completeness of its tools

Next

Our qualified personnel have acquired extensive experience in the sector, allowing us to design systems that are increasingly personalised and ground-breaking

valis-etech.com

BYTERD

Holdim widens its horizons with a significant **new presence in the diagnosis sector of the motor industry**

The winning idea

Vehicle diagnosis, repair, maintenance and overhaul

Next

Byterd's goal is to become a real project incubator at Holdim's service

byterd.it

GREENFORCE

GreenForce's current **project relates to sustainable mobility with the use of zero-emission systems/carriers**

The winning idea

In collaboration with Holdim Group, it works in the various areas of mobility and goods transportation, focusing in particular on the marine and railway sectors and on industrial applications

Next

Together with Holdim R&D, GreenForce develops energy systems with zero impact and provides specific turnkey solutions for every need, establishing relations with all the leading world suppliers in the field of alternative energy sources

AGRIDEA
SOCIETÀ AGRICOLA

This company of the Group l**ooks towards a sustainable future in the agricultural and hospitality sectors**, accentuating the local area and training up young professionals

The winning idea

A pioneering agricultural business, a training centre and an exclusive relais immersed in the countryside. Three ideas linked by the concept of sustainability

Next

Enhancing the Monferrato area, Agridea looks to partnerships for the development of alternative crops

CIRCUITO DEL MONFERRATO

In 2021, Holdim Group modernised an old racing **circuit for the support and development of vehicles powered by alternative fuels**, for sustainable expansion

The winning idea

The circuit will enable more in-depth tests with a practical, functional approach on any type of vehicle, simulating an urban road

Next

The future goal of the test centre is to become a ground-breaking reference technological hub for the major universities and OEM businesses

Facts and figures

The head office of the Group is in **Serralunga di Crea** (Alessandria).
The Group has a research and development center in Tuscany, and **commercial branches in 5 foreign countries** (Spain, Turkey, United States, Mexico and Costa Rica)
